Stakeholders' Newsletter

Merry holidays to all!

This pre-holiday issue wraps up this peculiar year.

Next year will mark the establishment of the European Cybersecurity Competence Center in Romania.

We covered it in the dedicated page "Update on the ECCC".

Also, help teachers to address cybersecurity in high-school replying to our survey at the end of this issue.

Enjoy your reading, and don't hesitate to [provide feedback](#).

CONCORDIA opened the door in cyberspace

CONCORDIA Open Door 2020 (COD2020) was the second edition of this recurring meeting among academia, industries, policymakers, and public administrations. These two days' objectives are to create synergy between different stakeholders from different domains and collect feedback for the future European cybersecurity landscape.

(Emerging) digital identity models and their impact on user-centric security

According to previous Chief Architecture of Identity at Microsoft, the Internet – as we know it today, was built without an identity layer. Moreover, the World Wide Web inventor, Tim Berners-Lee, recently started a new project named Solid to introduce a new digital identity layer. In this post, we will briefly review and present currently available digital identity models with a goal to better (try to) understand why the identity layer is so important.

Work in Progress: the CONCORDIA Platform for Threat Intelligence

Our first steps to improve Europe's information position in cybersecurity. We present CONCORDIA's vision for a cross-sector, pan-European platform for collecting, analyzing, and sharing threat intelligence, which combines datasets built up in different parts of the project.

KYPO
CYBER RANGE PLATFORM

CONCORDIA

KYPO Cyber Range Platform in a Nutshell

KYPO Cyber Range Platform is a flexible, scalable, and sophisticated virtual environment

have been **developed since 2013 by Masaryk University**

has already been **used for**

**university
education**

**professional
training**

based on modern approaches such as
containers, infrastructure as code, microservices, and open-source software

focused on practical applications we emphasized
repeatability, scalability, automation and interoperability

remote access to the platform
it is possible to complete the training
from anywhere in the world

Research and Innovation program under
Grant Agreement No 830927.

Suggested Articles from European Institutions

Cybersecurity of connected devices – Council adopts conclusions

European Council. On December 2, the Council of the European Union approved and adopted conclusions on the cybersecurity of connected devices. The Council acknowledged that connected devices would play a fundamental role in transforming Europe's digital future and hence ensuring their security was paramount.

Read the press release at:

[https://www.consilium.europa.eu/en/press-releases/2020/12/02/cybersecurity-of-connected-devices-council-adopts-conclusions/](https://www.consilium.europa.eu/en/press/releases/2020/12/02/cybersecurity-of-connected-devices-council-adopts-conclusions/)

EU'S highest court rules against pre-ticked box consent

Court of Justice of the European Union (CJEU). The CJEU published a judgment where it held that consent in the form of pre-ticked boxes is invalid. In order for consent to be valid and as rightly pointed out the CJEU, the individual user's consent must be freely given, specific, informed and unambiguous. That said, inactivity, silence or pre-ticked boxes cannot be construed as valid consent given by the individual users.

eGovernment Benchmark 2020: eGovernment that works for the people

European Commission. A study published by the European Commission on September 23 reveals that during the last two years the digital delivery of public services in Europe has improved. Residents in the EU largely benefit from these assessments as they highlight existing practices, areas where countries are excelling and also aspects that need to be further worked upon

European Cybersecurity Atlas

The European Commission has created the European Cybersecurity Atlas, a digital knowledge management platform to map, categorise and stimulate collaboration between European cybersecurity experts in support of the EU Digital Strategy. The Atlas is a first of its kind and will be an important support to the forthcoming European cybersecurity competence centre.

The new European Cybersecurity Competence Centre to be located in Bucharest, Romania

On 9 December 2020, Bucharest, Romania was selected by representatives of the governments of the EU member states as the prospective seat of the new European Cybersecurity Industrial, Technology and Research Competence Centre.

The Cybersecurity Competence Centre will improve the coordination of research and innovation in cybersecurity in the EU. It will also be the EU's main instrument for pooling investment in cybersecurity research, technology and industrial development.

Facebook sued for its role in Cambridge Analytica data scandal

After being fined £500,000 by the UK's data protection watchdog for its involvement in the Cambridge Analytica scandal, the social media giant is now facing mass legal action in England and Wales. The scandal involved the data of 87 million Facebook users which was used for advertising purposes during elections. The action is being led by the group Facebook You Owe Us, which argues that Facebook used the data of its users without obtaining their consent, thereby infringing data protection rules.

H&M fined record €35 MN for snooping on staff

German Data Protection watchdog (DPA) fined clothing brand Hennes & Mauritz AB (H&M) 35.3 million euros for violating the privacy of its staff. The violations which began in 2014 included storing information about the staff's private situation such as symptoms and medical findings for certain illnesses. In many cases, some managers of the company even obtained additional information from employees through informal chats including family issues or religious beliefs, which were also then stored in the system.

State of the Union address by president von der Leyen

On September 16, president of the European Commission Ursula von der Leyen outlined the priorities of the European Commission while speaking about a diverse range of topics such as the EU green deal, migration, minimum wage work and the like. The need to have a common plan for digital Europe with clearly defined goals for 2030 was highlighted that would also require clear principles such as "the right to privacy, freedom of expression, free flow of data and cybersecurity".
